Potent advice on how to think and act strategically in business, politics, and relationships--drawn from classic Chinese military and political expertise. The ancient strategies of war and politics have much to offer us in navigating the complicated challenges we face today--and to help us wisely and effectively meet our business, political, and relational goals. Here, eminent Chinese scholar and Taoist teacher Eva Wong unpacks the wisdom of The Thirty-Six Strategies, a collection of advice encoded in sayings, steeped in Chinese history and culture. She explores strategies attributed to renowned military philosophers such as Sun Tzu and Zhuge Liang (aka "The Sleeping Dragon"), along with other less-known advisors, that were implemented during three of the most chaotic eras of Chinese history--the Spring and Autumn Period, the Warring States Period, and the Three Kingdoms. Covering three categories of strategy--proactive, reactive, and desperate--Wong expertly connects the words of ancient military philosophers with timeless advice, as useful today as it was in the Tang dynasty (618-906) when this collection was originally gathered. In Chinese military philosophy and political theory, the thirty-six strategies are considered "yin" or "shadow" in nature, meaning that they operate best in darkness and concealment. As Wong writes, "Desperate times call for desperate measures, and since the thirty-six strategies rose out of times of war and conflict, it is inevitable that they were used to win wars, triumph over opponents, take advantage of situations, and survive when defeat is imminent."

What is a spiritual master? Spiritual Masters of the World’s Religions offers an important contribution to religious studies by addressing that question in the context of such themes as charismatic authority, role models, symbolism, and categories of religious perception. The book contains essays by scholar-practitioners on the topic of spiritual masters in Judaic, Christian, Islamic, Hindu, Sikh, Buddhist, Confucian, and Daoist traditions. It provides a full spectrum of exemplars, including founders, spiritual
masters who highlight cultural themes, and problematic figures of modern times. To define spiritual master, the work of Max Weber, Mircea Eliade, Daniel Gold, and Bruce Lincoln is referenced to provide a balanced notion that includes both religionist and reductionist perspectives. This book takes readers from the past spiritual masters to the future of masters of any sort, posing food for thought about the future of master-disciple relationships in an emerging age of egalitarian sentiments. Here is a classic Chinese text on the Taoist arts of longevity and immortality. The text dates from the Five Dynasties (907–960 C. E.) and is attributed to Chungli Ch’uan and Lü Tung-pin—two of the most popular figures of Taoism and Chinese culture. This text focuses on Taoist inner alchemy, a theory and method for transforming the mind from within by using practices such as breath control, calisthenics, meditation practices, and sexual alchemy (the method of gathering energy from a sexual partner). The teachings address the following topics: • The nature of immortality and how it can be attained by realizing the laws of the Tao within us • The art of health • The art of longevity • How to deal with obstacles and recognize spiritual progress The Art of Health, Longevity, and Immortality will be of interest to both beginning students of Taoism and scholars. Wong’s introduction includes a concise overview of the evolution of Taoist longevity practices as well as an elucidating section for readers who are unfamiliar with the teachings and practices of Taoist inner alchemy. She also includes a list of helpful hints for reading and understanding each section of the text. Reflect on the last time you met someone new. Think about how you felt as you introduced yourself. Were you instantly comfortable? Or was there a hint of uneasiness? The energy between was either positive or negative, and probably not at all related to the way the person was dressed, or how they wore their hair. It was just something that either made you feel like hanging around and talking, or making an excuse to leave. That was energy. We feel energy, though we do not see it. Energy between people exists. Call it what you like - familiarity, connection, in sync, out of sync, instant bond, love at first sight, good vibes, kismet, whatever. Energy moves back and forth between people, and either feels pleasant, or not; and relates directly to element compatibility. If you doubt me, check it out for yourself. The next time you are around someone you feel very connected to, or vice versa, ask their birthdate, do the math, and you will likely discover his or her Feng shui element is either in or out of sync with your own. Relationship based care (RBC) studies are popping up quite a bit lately as a means to enhance patient well-being and slow the progression of dementia. This book takes the question a step further with my own observations of more than 200 different care relationships with my mother. I have found time and again a link between caregivers' personal elements and compatibility with Mom - enough so to prompt the writing of this book. History and legend are interwoven in this folk novel that both entertains and instructs. Written by an unknown author, Seven Taoist Masters is the story of six men and one woman who overcome tremendous hardships on the journey to self-mastery. These characters and their teacher, Wang Ch’ung-yang, are all historical figures who lived in the Southern Sung (1127–1279) and Yuan (1271–1368) dynasties. Wang is regarded as the greatest patriarch of the Complete Reality school, a highly purified branch of Taoism having a strong affinity with Zen Buddhism. The novel brings to life the essentials of Taoist philosophy and practice, both through the instructions offered by
Wang—on topics such as the cultivation of mind and body, meditation techniques, and overcoming the obstacles to enlightenment—and through the experiences of the characters.

Today there is a bewildering diversity of views on ecology and the natural environment. With more than two hundred distinct and valuable perspectives on the natural world—and with scientists, economists, ethicists, activists, philosophers, and others often taking completely different stances on the issues—how can we come to agreement to solve our toughest environmental problems? In response to this pressing need, Integral Ecology unites valuable insights from multiple perspectives into a comprehensive theoretical framework—one that can be put to use right now. The framework is based on Integral Theory, as well as Ken Wilber's AQAL model, and is the result of over a decade of research exploring the myriad perspectives on ecology available to us today and their respective methodologies. Dozens of real-life applications and examples of this framework currently in use are examined, including three in-
depth case studies: work with marine fisheries in Hawai‘i, strategies of eco-activists to protect Canada’s Great Bear Rainforest, and a study of community development in El Salvador. In addition, eighteen personal practices of transformation are provided for you to increase your own integral ecological awareness. Integral Ecology provides the most sophisticated application and extension of Integral Theory available today, and as such it serves as a template for any truly integral effort.

To age with the sun and moon and be renewed by spring and summer, to conserve the seeds of growth in autumn and winter and to be nourished by the eternal breath of the Tao—these are the goals of the Taoist alchemists, the masters of the arts of health, longevity, and immortality. This book is a translation of a concise Taoist alchemical manual known as the Dragon-Tiger Classic, along with its two most important commentaries. The classic, written in ancient times by an unknown author and published during the fifteenth century BCE, is regarded by contemporary Taoist practitioners as the most complete guide to spiritual transformation. It covers the three forms of Taoist practice: • External alchemy, concerned with the ingestion of minerals, herbs, and other substances to attain health, longevity, and immortality • Sexual alchemy, in which the practitioner uses the energy of a sexual partner to cultivate his or her own energy • Internal alchemy, the practice of meditation, calisthenics, and yogic postures to cultivate mind and body An extensive introduction by the translator and the inclusion of two commentaries by traditional Chinese authors aid the reader in understanding this concise, symbolic text.

The great depth and diversity of Taoist spirituality is introduced in a single, accessible manual Millions of readers have come to the philosophy of Taoism thanks to the classics Tao Te Ching and the I Ching, or through the practices of t’ai chi and feng-shui, but the Tao is less known for its unique traditions of meditation, physical training, magical practice and internal alchemy. Eva Wong, a leading Taoist practitioner and translator, provides a solid introduction to the Way. All of Taoism’s most important texts, figures, and events are covered, as well as its extraordinarily rich history and remarkable variety of practice. Sections include: • The History of Taoism traces the development of the tradition from the shamans of prehistoric China through the classical period (including the teachings of the famous sage Lao-tzu), the beginnings of Taoism as a religion, the rise of mystical and alchemical Taoism, and the synthesis of Taoism, Buddhism, and Confucianism. • Systems of Taoism explores magical sects, divination practices, devotional ceremonies, internal alchemy, and the way of right action. • Taoist Practices discusses meditation, techniques of cultivating the body, and rites of purification, ceremony, and talismanic magic. This roadmap to the spiritual landscape of Taoism not only introduces the important events in the history of Taoism, the sages who wrote the Taoist texts, and the various schools of Taoist thinking, but also gives readers a feel for what it means to
practice Taoism today. A comprehensive bibliography for further study completes this valuable reference work.

Feng Shui, the art of Wind and Water, emerged 3,000 years ago in China and gradually evolved over time as new theories and new models were introduced. While its development was driven by the primary needs of survival and defence, it would later be enhanced with concepts relating to culture, philosophy, the climate and the territory. Thanks to the work of Pierfrancesco Ros’ Accademia Italiana di Architettura Feng Shui, Feng Shui has been further expanded with ancient and modern knowledge relating to environmental well-being. Feng Shui Architecture offers the reader project guidelines for use in town planning, architecture, interior design and ecodesign. The first volume examines the key issues of the earth way and the sky way. The second and final volume, produced with the contribution of the Accademia di Psico Architettura, looks at the man way, establishing a global approach to various types of environmental analysis and design for a complete understanding of Holistic Architecture.

Here, Taoist practitioner Eva Wong offers a colorful treatment of the history and evolution of Taoism, told through traditional teaching tales. These tales, which Wong first heard as a child growing up in Hong Kong, are gleaned from the local storytellers and the uncensored chronicles known as yeshi—the wild history of China, not monitored by the official imperial scholars and historians. The stories are by turns mysterious and intriguing, passionate and violent, and they are peppered with colorful characters, including hermits, politicians, social activists, revolutionaries, scholars, scientists, and mystics. Arranged chronologically from prehistory through the early twentieth century, these stories introduce the schools in the Taoist lineages, and capture the defeats and victories of Taoism, its periods of decadence and decay, and its renewal, maturation, and spiritual triumph. Wong puts these stories into context, and shows that Taoism is a dynamic spiritual tradition, constantly changing—and being influenced by—history.

The teachings of Taoism, China's great wisdom tradition, apply to every aspect of life, from the physical to the spiritual—and include instruction on everything from lifestyle (a life of simplicity and moderation is best) to the work of inner alchemy that is said to lead to longevity and immortality. Here, Eva Wong presents and explains three classic texts on understanding the Tao in the macrocosm of the universe and the microcosm of the body that provide an excellent overview of the three traditional levels of the Taoist teachings—Outer, Inner, and Secret. The Outer teachings are concerned with understanding the Tao as manifested in nature and society. They are easily accessible to the layperson and consist of the Taoist philosophy of nature and humanity, advice on daily living, and a brief introduction to the beginning stages of Taoist meditation. The Inner teachings familiarize the practitioner with the energetic structure of the human body and introduce methods of stilling the mind and cultivating internal energy for health and longevity. The Secret teachings describe the highest level of internal-alchemical transformations within the body and mind for attaining immortality.

As a girl growing up in Hong Kong, Eva Wong heard and memorized many tales told to her by Hong Kong's finest professional storytellers, by actors on the radio, and by her grandmother. These popular tales of the Taoist immortals were also often dramatized in Chinese operas. The stories are of famous characters in Chinese history and myth: a hero's battle with the lords of evil, the founder of the Ming dynasty's treacherous betrayal of his friends, a young girl who saves her town by imitating rooster calls. Entertaining and often provocative, these tales usually include a moral. The immortals are role models in Chinese culture, as well as examples of enlightenment. Some of the immortals were healers, some were social activists, some were aristocrats, and some were entrepreneurs. The tales chosen by Eva Wong here are of the best-known immortals among the Chinese. Their names are household words and their stories are told and retold by one generation to the next.
